Situation: The catastrophic events at the Antei and Phare systems have resulted in a severely depleted and outnumbered force operating under the command of Grand Master Cotelin. Taldryan and HOU elements have combined to form an adhoc fleet designed to buy time for key leaders of the Rebels to reach Korriban's surface.

Mission:
Rebel Forces will attack to destroy the Loyalists Flagship, the Super Star Destroyer *Suffering*, in order to disrupt forces under Grand Master Ashen and allow friendly Rebel assault forces to reach the planet of Korriban.

Coordinating Instructions: You are only required to devise a detailed plan on how your outnumbered and outgunned forces will destroy the Executor Class Star Destroyer *Suffering*. You may board and destroy the *Suffering*.
