

## **Battle Plan - Mission 1 : Loyalists**

### **Mission:**

The NSD Gauntlet, NSD Invicta, ISD II Magnus Kaerner, VSD II Covenant, along with all crew and fighters assigned there within (henceforth referred to as Strike Team Alpha) shall travel to the designated hyperspace destination point for the Super Star Destroyer Suffering. Strike Team Alpha shall enter the afore mentioned sector of space and destroy all enemy forces found within. Strike Team Alpha is authorized to use any mean necessary to accomplish the task set before them.

### **Phase 1 - Initial Engagement Plan**

Strike Team Alpha shall enter the sector of space designated as the destination of Super Star Destroyer Suffering. After a recon of the area it has been determined that this sector of space is currently being occupied by capital ships under the command of Esoteric. These capital ships are as follows.

- ISD II Grey Wolf
- ISD II Intrepid
- ISD II Vanguard
- VSD II Aggressor

### *Phase 1 plan A*

Strike Team Alpha will exit hyperspace in designated sector between 4000 and 5000 meters from enemy forces. The NSD Invicta and VSD-II Covenant shall activate their gravity well generators to prevent enemy forces from escaping the battle. All capital ships in Strike Team Alpha shall launch their full compliment of starfighters at this point. All starfighters shall target VSD-II Aggressor and engage. The capital ships of Strike Team Alpha shall split into two groups. Group A shall consist of ISD-II Magnus Kaerner and NSD Gauntlet. Group B shall consist of NSD Invicta and VSD-II Covenant.

All starfighters shall move at maximum speed to engage the VDS-II Aggressor once they have cleared their respective hanger bays. The Main goal of the starfighters is to destroy their target quickly and efficiently. However, if they fail to accomplish this during phase 1 then they are to ensure that they deliver maximum damage to the bridge, engines, and weapons systems of the VSD-II Aggressor. If the Aggressor is not destroyed then it is to be too disabled to fight or flee. Once the Aggressor has been destroyed the starfighters are to split into two equal groups and move to assist Group A and Group B

Group A shall move to engage ISD-II Grey Wolf and ISD-II Vanguard.

Group A's main goal at this point is to deliver maximum amounts of damage to their targets in the areas of the bridge, engine, and weapons systems. Group A is not to focus on destroying their targets at this point, instead they are to keep the ISD-II Grey Wolf and ISD-II Vanguard from engaging Group B and or the starfighters. Once the Starfighters have destroyed the VSD-II Aggressor, half of their remaining number shall move to assist Group A. Once the starfighters have arrived, they will engage the enemy starfighters and defend the capital ships at all costs

Group B shall move to engage ISD-II Intrepid.

Group B is to locate close with and destroy the ISD-II Intrepid. Main points of attack shall be bridge, weapons systems, engines in that order. Group B will destroy their target by any means necessary at this point in the battle. Once the ISD-II Intrepid has been destroyed, Phase 2 shall be initiated.

### *Phase 1 plan B*

Strike Team Alpha shall exit hyperspace in the sector of space that is designated as the destination for Super Star Destroyer Suffering. Upon returning to real space all capital ships will deploy their full complement of starfighters from their hangar bays. VSD-II Covenant will move ahead of the rest of Strike Team Alpha. The Covenant will locate the enemy ISD-II Vanguard and target it. Taking careful aim and alignment, the Covenant will make the jump to

hyperspace from 3000 meters away from the ISD-II Vanguard to add additional momentum and kinetic

energy to add additional force and damage upon collision. VSD-II Covenant will strike the Vanguard on the bridge or slightly lower than the bridge, destroying both capital ships in the process.

Once the ISD-II Vanguard has been destroyed all starfighters shall move to engage the VSD-II Aggressor. The NSD Invicta will activate its gravity well generators to prevent enemy forces from escaping. The remaining capital ships of Strike Team Alpha will move to engage the two remaining enemy ISD-II's. This will begin Phase 2

## **Phase 2 - Engagement Plan**

### *Phase 2 plan A*

If the starfighters have not destroyed the VSD-II Aggressor, they will do so at this point and then split into two even groups: one group move to assist Group A whilst the other moves to assist Group B. The starfighters will now be considered parts of the groups they have moved to support. The starfighters main mission as a part of their group is to defend their respective capital ships at all costs and engage the enemy starfighters.

### Group A

Group A shall now switch from keeping the ISD-II Grey Wolf and ISD-II Vanguard away from Group B to corralling the ISD-II Grey Wolf away from the ISD-II Vanguard. Group A will assault the ISD-II Grey Wolf with the intent to destroy it at all costs. They shall target any remaining critical systems and focus fire upon them. Once all critical systems have been disabled or destroyed, Group A will ensure they have moved to a safe distance. Once they have attained a safe distance, Group A will focus all of their fire on the ISD-II Grey Wolf's main reactor to ensure destruction of their target. Once the ISD-II

Grey Wolf has been destroyed, Phase 3 shall begin.

### Group B

Group B initiate movement toward ISD-II Vanguard. The starfighters attached to

Group B will move at full speed to engage the ISD-II Vanguard and ensure that it will not interfere with the destruction of the ISD-II Grey Wolf. The Capital ships in Group B will move to engage the ISD-II Vanguard with the intention to keep it away from Group A. They will accomplish this task maintaining as minimal damage as realistically possible.

### *Phase 2 plan B*

All of the starfighters will engage VSD-II Aggressor with the intent to destroy it. They will accomplish this task no matter the cost.

While the starfighters are engaging the VSD-II Aggressor, the remaining capital ships of Strike Team Alpha the NSD Gauntlet, the NSD Invicta, and the ISD-II Magnus Kaerner will move to intercept the ISD-II Grey Wolf and the ISD-II Intrepid. The primary goal of Strike Team Alpha capital ships is to intercept the enemy ISD-II's and keep them from interfering in the destruction of the VSD-II Aggressor. The Main targets upon the enemy capital ships will be the weapon systems, engines, and bridge in that order.

Once the VSD-II Aggressor has been destroyed Phase 3 of the battle shall begin.

### **Phase 3 - Completion Plan**

### *Phase 3 plan A*

Once the ISD-II Grey Wolf has been destroyed Group A will send their starfighters ahead of them to rendezvous and join with Group B starfighters as the capital ships move to rendezvous with Group B capital ships.

Once Strike Team Alpha has fully rejoined they will then direct all fire upon the ISD-II Vanguard with the intent to destroy. Strike Team Alpha starfighters will maintain protection of their respective capital ships and engage any remaining enemy starfighters. If no enemy starfighters are left at this point, they will join in the assault on the ISD-II Vanguard.

Once the ISD-II Vanguard has been destroyed Strike Team Alpha shall conduct a full count of surviving friendly forces. While this is happening the starfighters shall sweep the sector for any remaining enemy starfighters. Once the sector has been deemed clear Gravity Well Generators shall be shut down and starfighters will return to their respective capital ships. The Surviving capital ships will spread out into defensive positions and await the arrival of the Super Star Destroyer Suffering.

### *Phase 3 plan B*

Once the VSD-II Aggressor has been destroyed all starfighters will target the ISD-II Intrepid and move to engage. The starfighters will assault the ISD-II Intrepid with intent to destroy the Intrepid. They will accomplish this task at any cost and using any means necessary.

The Capital ships will coral and assault the ISD-II Grey Wolf. They will target the weapons systems, engines and bridge in that order and with intent to destroy the Grey Wolf. The Capital ships of Strike Team Alpha will take any actions necessary to insure the destruction of the ISD-II Grey Wolf.

Once the two remaining enemy capital ships have been destroyed, the surviving members of Strike Team Alpha will consolidate and conduct a full count of surviving friendly forces. Once this has been completed, the Starfighters of the VSD-II Covenant will be assigned a capital ship with room to house them. After the starfighters have a capital ship, they will go with their capital ship and conduct a sweep of the sector to eliminate any remaining enemy starfighters. Once the sector has been cleared, Strike team Alpha will spread out into defensive positions as the starfighters return to their respective hangar bays. Once defensive positions have been established, all gravity well generators will be shut off and Strike Team Alpha will await the arrival of the Super Star Destroyer Suffering.

### **Special Considerations**

All capital ships with gravity wells will have them running during the battle to remove the enemies ability to escape via hyperjump.

If a capital ship drops below 30% operations capability, they will target the closest enemy Capital ship and set a collision course in an attempt to destroy or disable the enemy capital ship to allow the remainder of Strike team Alpha to easily finish off the enemy off.

If a starfighter has lost their capital ship, they will continue to fight as if they had not. If they have taken heavy damage to where their ship is no longer capable of combat operations, they will find an enemy ship and collide with it.
