Zombie Launcher 2

6) Orange tiles are more fragile than the rest of the land. If your block stands up vertically on an orange tile, the tile will give way and your block will fall through.

7) Finally, there is a third type of switch shaped like this: () It teleports your block to different locations, splitting it into two smaller blocks at the same time. These can be controlled individually and will rejoin into a normal block when both are placed next to each other.

8) You can select which small block to use at any time by pressing the spacebar. Small blocks can still operate soft switches, but they aren't big enough to activate heavy switches. Also, small blocks cannot go through the exit hole -- only a complete block can finish the stage.

9) Remember the passcode for each stage. It is located in the top right corner. You can skip straight back to each stage later on by going to "Load Stage" in the main menu and entering the 6 digit level code.

Enjoy!
