Introduction

---

The Red Fury Pirates have been pushed back from their base on Mygeeto. Clan Naga Sadow now has secured the base and the artifacts, and is awaiting transports to arrive to move them off world to a more secure location. Clan Scholae Palatinae is en route to the base to claim the artifacts for themselves and the Red Fury Pirates are coming up from deeper in the base.

---

**Forces**

Clan Naga Sadow has 300 soldiers and 6 Clan members proper.

Clan Scholae Palatinae has a comparable force or approximately 300 soldiers and probably around 6 Clan members proper.

Red Fury Pirates have an unknown number coming up the lower levels of the base.

---

### **Plan**

This will be a defensive plan, with a focus on keeping the enemy forces from making it past the front lines and into the base.

Two of the lowest ranking members of the Clan and 20 soldiers will be tasked with dealing with the Pirates coming from below. Orders of blocking the entrances with explosives is authorized if it looks like they will be over run, or if those guarding the artifacts are being attacked.

The next lowest ranking Clan member and 10 soldiers will be tasked with guarding the artifacts and making sure that there are no breaches there.

The remaining 270 soldiers and Clan members are to fortify the front entrance. Focusing on bottlenecking any attempts by Clan Scholae Palatinae at entering the base. Sniper teams will be set up inside with clear views out the front doors. If the force guarding the artifacts gets attacked, then 50 of the soldiers are to break off protecting the front door, and reinforce the artifact guards.

---

### **Contingency Plan**

In the event that the front entrance is about to be overrun, all forces are to blow the entrances to delay the enemy forces and fall back to the artifact room.
