General Aspects

By The Numbers

Saiy is a scientist through and through. This lends itself to every aspect of her life. Calculation is used for every decision that is made, from who to interact with and how, to what to eat for meals. This can come across to others as being cold and uncaring, but to Saiy it's all for the sake of her science.

Alternative Methods

Saiy's skills as a medic are not just limited to holo-books and lectures. She has read up and practiced a handful of experimental treatments while inventing a few home remedies of her own. This allows Saiy'incee'Pirsn to work outside the box in less than ideal situations, and can lead to him solving mysteries other trained medics might struggle with. This, of course, comes with its own string of failures, as nothing is ever perfect. That, and some of the more established professionals in the field often doubt or question Saiy's alternative practices. She typically brushes them off in favor of doing everything she can to help a patient, but does quietly seek recognition for accomplishments as a healer.

Personality Aspects

Always The Control

Saiy sees herself as the control subject in the science experiment called life. Boring and predictable, Saiy keeps her wild and experimental side reserved for her projects. This boring lifestyle leads to Saiy being considered anti-social and when she does join others, instead of relaxing she prefers to observe.

Outside The Box

Saiy'incee'Pirsn is a lateral thinker, and when she encounters problems or dilemmas, she is very good at improvising and coming up with alternative solutions. This allows Saiy to find ways out of situations others might give up on. While these solutions are often not so obvious to others, Saiy can typically explain and lead others through her plan...as long as they are patient and willing enough to trust her outside thinking.

Combat Aspects	
A Proposed Hypothesis Saiy'incee'Pirsn is not one to rush into a fight, in fact she'll avoid a fight at all costs. Saiy will attempt to outsmart and disarm an opponent using just her words, though she can often talk people out of a conflict many times people will see through her words.	Experiment Gone Wrong Saiy, like all members of the Collective, is trained with a blaster though, just like any weapon, she hates to use it. Instead, when forced to fight Saiy will use her surgical scalpels and anesthetics to attempt to injure and incapacitate her enemies. This requires her to get extremely close to her attackers and leaves her vulnerable to ranged attacks.

Notes/Extra

Saiy has dedicated her life to science and has dedicated her science to creating technology for the Collective. Not only does Saiy'incee'Pirsn believe in Rath Oligard's cause but she also believes that her technology will be what helps defeat the Brotherhood once and for all.
