

**CLASSIFIED**

**MICHAEL BRAT**  
Lieutenant, Order of the Loyalist  
Hunter, Human Male, Left Handed  
Height: 1.67m / 5'5"ft. , Weight: 52.2kgs / 115lbs Age: 19 years

Physical Description		Loadout Weapons
Michael Brat's dark complexion almost blends into his dark brown colored hair. Much of his short, slim, and scrawny body lacks any significant scars or markings, despite being a slave for much of his life. He does have a branding tattoo on his thigh, burned into his skin by one of his former owners. His face is adorned with a cybernetic enhancement that allows him to stay connected to his computer at all times.		* Assassin's Datapad * Computer Spike Kit * H-Series Performance Datapad * Hunting Knife
General Aspects		
<b>Circuit-Brained</b> Brat loves to play with computers and enjoys interacting with them more than he does with people. Some may call him antisocial - and they'd be right.		<b>Former Slave</b> Brat grew up never knowing his family. He was sold into slavery very young, and was put to work almost immediately. However, due to his age, Brat bounced from owner to owner until he became a teenager. Having to endure horrible treatment during this time in his life, Brat has lingering trust issues while carrying an absolute hatred towards slavers. If confronted with acts of slavery, he will most likely lash out in some way, regardless of if it compromises his objective.
Personality Aspects		
<b>Lone Wolf</b> Brat doesn't like to work in groups or teams and feels most comfortable on his own. Brat sticks to himself, sets his own pace, and doesn't share feelings or emotions with others. While the Lone Wolf can get things done quietly and efficiently, he tends to be emotionally cut off and has problems relating to his comrades.		<b>Straight Shooter</b> The character tells it like he sees it, when he thinks it; and he doesn't try to sugar coat what he says.
		

Combat Aspects	
<b>Combat Slicer</b> While Brat avoids combat whenever possible, he has no qualms working with technology under the stress and pressure of combat. Brat has trained himself to keep calm and focus intently on <i>Slicing</i> even when taking blaster fire from cover or when placed under time constraints. In truth, Brat almost works <b>better</b> when under duress, and actually needs motivation, typically, when <i>Slicing</i> .	<b>Go Go Gadget</b> Brat's passion for technology extends beyond his talent with <i>Slicing</i> . He truly believes that wars can be won with technology, not soldiers, and will always try to avoid direct combat if he can afford it. Instead, he prefers to deploy clever traps with <i>Explosives</i> , or turn technology against others as a weapon. Brat would rather overload a circuit breaker to shock a guard into submission than to test his luck with his hands or a blaster. If removed from his technology or his gadgets, however, Brat can easily be overwhelmed. Fortunately, he has no qualms with throwing a smoke grenade down and running for dear life.

### Additional/Optional Information

#### Notes/Extra

Michael Brat was a slave, set free by Varryn Antillus, to whom Brat remains fiercely loyal. At his young age, many consider him a genius prodigy when it comes to all kinds of computer systems, but his intellect goes far beyond that. He finds himself exceptionally talented at hunting down subjects using financial data and transaction history. He scours databases looking for clues as to a subject's whereabouts. He has a knack for predicting where and when his subjects will show up. When he is completely certain about someone's location, very rarely does he join the team that goes to exterminate the threat.

While being a member of the Collective, Brat shows loyalty only to Master Antillus and his decisions. Should the Capital Enterprises cease support for the Collection and their mission, Brat would follow suit.
