

On the outskirts of the city of Aliso, separate from the city structure, sits a medium sized farm, enclosed within a fairly tall fence. This fence easily covers a few acres, and creatures of various sizes and shapes can be seen grazing and roaming the enclosure.

Farther off, there's an enclosure for flying creatures as well. This enclosure is covered to prevent the creatures inside from flying off, though there is, of course, plenty of room for them to move around and fly.

Even further, and attached to a lake, there is a third enclosure, housing aquatic based lifeforms. This includes a dam like operating system, allowing the flow of water in, but keeping the creatures themselves from leaving.

Upon entering the farmhouse, it becomes clear that these animals are available to be rented out or purchased, whether your desire is a new pet, or a more seriously trained mount, they have a wide selection of creatures from many different planets, not just those native to Aliso.

Creatures found in this area are well trained, though their different personalities have not necessarily been subdued. They can be purchased as they are, or there is an extra fee should the new owner wish add more specific training.
