

## ===== PERSONAL DATA =====

## NAME

Last: Arronen                      First: Qyreia                      Middle: N/A

Other: N/A

RACE: Zeltron                      SEX: Female

## DATE OF BIRTH

Year: +08 (ABY)                      Month: 09                      Day: 02

## EMERGENCY CONTACTS

Primary: Keira Viru

Relationship: Significant Other

Comm Code: SELE-26-5640-9981-317                      Address: Not given

Secondary: Bened Arronen

Relationship: Father

Comm Code: ZELT-54-7876-0030-425                      Address: Not given

## PRIMARY CARE

Personal: None

Practice: N/A

Comm Code: N/A

Employer: Morrill Wynn, MD

Practice: Family/General, Estle City Municipal Hospital

Comm Code: SELE-26-3112-6589-0801

## ===== CURRENT RECORD =====

HEIGHT: 1.7 (meters) WEIGHT: 63.5 (kilograms)

## COLOR

Skin: Red Hair: Blue Eyes: Gray/Blue

BLOOD TYPE: A POS

Allergies: None

Current medications: None

Current conditions: None

## LAST PHYSICAL

DATE: +35/02/06

EXAMINER: Morrill Wynn, MD

Blood Pressure: 123/69

Pulse: 62 BPM

Vision: 20/20

RAPD: Normal

Hearing: Normal

Test: 14 dB

Respiratory: Normal

Viral Scan: Normal

Bacterial Scan: Normal

Gastro: Regular

Uro: Regular

BMI: 11%

## FEMALE ONLY

Gyno: Normal

Obst: N/A

Pap Smear: Normal

Cervix: Normal

Uterus: Normal

Menstrual: Regular

Mammo: Normal

## NOTES

- Recommended to patient to reduce (binge) drinking based on questionnaire results.
- Noted significant lack of pheromonal output; test results show 0.5 ppm, well below the 0.7-1 ppm in humans and 3-4 ppm in Zeltrons (ref. Xuniga Pheromone Theorem, -14/07). Patient claims conscious control, thus the reduced numbers. Possible effects unknown.
- Showed interest in same-sex fetal propagation. Referred to obstetric gene therapy.

## ===== HISTORICAL RECORD =====

## HOSPITALIZATION

- +35/09/35 (Selen, Dajorra): Multiple lacerations and contusions present, noted cause from combat/incarceration. Bacta treatment administered; released same day.
- +35/01/07 (Sepros, Orion): Mild decompression sickness. Scanned for complications, none present; released same day
- +34/08/28 (Sepros, Orion): Several lacerations and contusions present, noted cause from combat; showed signs of neurological shock similar to seizure, cause unknown/not given. Bacta patches and bandages administered; released same day.
- +34/08/02 (Sepros, Orian): Mild concussion; dermal, muscular, and skeletal contusions; severe laceration behind right ear; mild laceration on forehead; severe dehydration; abrasive skin irritation on back and shoulders; skin abrasions on wrists and ankles (hog-tied); mild heat exhaustion; one stubbed toe. Administered bacta bath and monitored three days; released without further complication.
- +34/05/28 (Palioxis Stn, Kiast): Blaster impact, right gluteal tissue. Bacta injection and patch; released same day.
- +34/09/33 (Aeotheran, Orion): Multiple contusions and minor lacerations; major laceration on scalp; hairline fracture in left radius and ulna; severe heat-laceration (blaster) on right upper-arm, lateral side. Administered bacta bath; released same day.
- +34/10/09 (Gamuslag, Orion): Severe heat-laceration (blaster), anteroposterior, along right shoulder to shoulder blade. Administered bacta injection and patch, injected 20cc Nullicaine; released same day.
- +31/03/20 (Kashyyyk, Kashyyyk): Follow-up from wroshyr fever. No symptoms present; scans confirmed recovery; released same day.
- +31/02/15 (Kashyyyk, Kashyyyk): Presented symptoms of wroshyr fever (severe fever, nausea, diarrhea, delirium). Given antivirals and saline to maintain hydration; monitored sixteen (16) days until recovered; released after vaccination and prescribed additional antivirals.
- +29/07/18 (Belisk Stn, Perlemian TR): Collapsed without apparent cause; severe fever; comatose six (6) days; severe neurological shock; cause of symptoms unknown. Ran test battery due to patient's racial disposition; noted low pheromone concentration (1.2 ppm); relation to condition unknown. Monitored patient one day after regaining consciousness; released with expected recovery from latent fatigue.

## FAMILY HISTORY

Heart disease:	None	Obesity:	None	Diabetes:	None
Seizure:	None	Stroke:	None	Alzheimer:	None
Cancer (Mal):	None	Cancer (Ben):	None	Glaucoma:	None
Arthritis:	None	Asthma:	None	Liver Dis:	None
Kidney Dis:	None	Stones (G/K):	None	Sinus Inf:	None
Hi Blood Pres:	None	Pneumonia:	1	Ear Inf:	None
Osteoporosis:	None	Gastrointestin:	None	Ulcers:	None

## Explanations:

pneumonia - presented in ancestor approx. 25 BBY; no other known cases; deemed irrelevant, withhold in future exams

## TREATMENTS NOT LISTED ABOVE

Hermotizol - +27/02/15 to +28/07/18 - 500mg - 125CR/bottle

Hormonal suppressant; prescribed to reduce patient's ability to produce pheromones coinciding with normal concentrations

Meditative Therapy - +27/08/04 to +28/08/27 - N/A - 50CR/session

Outpatient counseling designed to maximize conscious control of natural bodily functions; adjusted for racial biology

Medroxyprogesterone acetate - +30/02/21 to +31/05/09 - 50cc -

30CR/hypo

Birth control injection; maintained regular apointments
