

Dbb0t

## The Signal and the Noise\*

Dbb0t does not make uninformed assessments. For the past twenty years, Dbb0t has accumulated, stored, and analyzed data from across the universe and more importantly from within the Dark Brotherhood. Join records, recruitment sources, test scores, master and apprentice relationships, transfers, promotions, awards, activity in combat, and leadership performance are all measured and analyzed against a set of Dbb0t's own criteria. It is within this construct that Dbb0t makes predictive analysis on how and who should lead the Brotherhood; however, these decisions often lack "gut" instinct that others believe is equally valid.
