

**Name: Force Inhibitor Implant(s)**

**Item Category: Implant(s)**

**Store: Utilis Innovations**

**Rarity: Legendary: Orange**

**Item Description:**

The FII is a non-biodegradable implant that comes in two parts.

This item is surgically implanted in 2 locations of a person or sentient being: one by their heart and one in their brainstem. It completely nullifies access to the "Force" just like a Ysalamir is able to do. Beings that are attuned to the force, have their connection negated and are withdrawn and emotional wrecks. Only can be removed via precision surgery by the doctor(s) or surgeon(s) that implanted as it is embedded with the suregon's DNA signature.

If either is removed by anyone other than the above, both implants explode and kill their host, i.e. brain and heart explodes. Both are linked to each other with a close proximity system of within 2-3 feet of each other.

The Collective uses these implants on their prisoners of war (POWs) to turn Force attuned beings into mindless zealots that are easier to brainwash and reprogrammed to do their bidding.
