

## Ordu Aspectu Temple Venue

While there is much undiscovered about the Ordu Aspectu Temple, many have ventured in to take advantage of what is known; there is treasure. With archaeological digs revealing the presence of kyber crystals and various artifacts, many contracts send individuals in to secure mythical artifacts and obtain kyber crystals. It is located deep beneath the Lyra Colony, and has long since been abandoned by its creators.

Despite the abandonment and the test of time, the bedrock in which it was carved from is plenty sturdy, preserving all but the temple's outer pillars to near pristine condition. Because of the cave that was utilized as an open area to dramatize the entrance to the temple, there is a clear opening directly outside the entrance. This opening is filled with stalactites with some stalagmites off the main path. One must be careful, as there is an overwhelming presence of moisture in the air that has led to mildew covering every inch of the cave.

It is much more crowded within the temple, as it seems to have been more for worship and living quarters than for training. Hallways are narrow, rooms small, and the one great hall is not as open as many traditional temples' halls. One with claustrophobia would be at odds with themselves to venture within.

Because of the more recent archaeology digs, there is a small opening near the top of the cave which will let in some light, but because of the depth of the temple, it is too faint to make out any real detail on what lies within.
