

**Item Name:** Blas-Slug 7764 Rifle

**Item Category:** Special Weapon (Blaster + Slugthrower Rifle)

**Proposed Store:** Antei Armaments

**Proposed Rarity:** Rare

**Item Description:**

The Blas-Slug 7764 Rifle is a combination of two types of weapons in galaxy, projectile (slugthrower) and energy (blaster), where it combines the best of both types of weapon. It can be switched to the preferred mode by activating a switch on the rifle. The slugthrower mode is usually used to shoot enemy at very long-range, thanks to its top-mounted optical scope. Slugthrower rifle is favored by snipers since it does not leave a visible trace as blaster does. And for close-quarters combat, the Blaster mode is more preferred as it allows a high rate of fire, capable of piercing even a powerful armor with ease. Although the rifle is made of lightweight modern materials, it is still heavier than a slugthrower or a blaster rifle alone. And also it is pricey.
