

A Submission to the Competition:
[Celebration: Mandalorians] Unifying Symbol

Written by Reiden Karr (10106)

Mandalorian Values Pendant:

The [name here] is a simple durasteel necklace attached to a silver chain with a design and meaning that draw from parts of Mandalorian culture. The design features an interconnected array of three oval-like shapes spread out equally from a center point, looking much like a knot. These shapes are comprised of two mythosaur horns facing in opposite directions to form an oval, and carry separate meanings. One is for loyalty and brotherhood, one is for contracts, and the final one is for credits. These recognize that Mandalorians place pride and honor in where they're from while also giving a nod to the fact that Mandalorians are often bounty hunters and mercenaries. The design reflects where these three things intersect in many Mandalorians, each person a sum of the parts of their beliefs.
