

Renali's Rest

A Benediction of Suffering

A long forgotten settlement of human surveyors that was overrun by the Valneikian Hive. Suffering permeates the remains, feelings of pain and death drew the attention of Wrathus. The buildings are in ruins and long overgrown with twisted plant life. Wrathus used the ruins as collection and torture center. Corpses are strung up all along the streets, crucified and mutilated. Large sections of the town have been reduced to ashes and rubble. The location has been scrubbed from all records and anyone who knows about it is often silenced. Should you be unfortunate enough to find yourself in the ruins, be on your guard, for Renali's Rest is not uninhabited.

These charred and devastated ruins are populated by the tormented spirits of those who had perished on the grounds. But they are not alone.

No one knows who, or even what, it is. But the ruins are home to a twisted, tormented creature that seems to feed on the bodies that litter the grounds. The creature and the spirits seem to have a cooperative relationship, with the purpose of eliminating any living creatures cursed to find the location. So many beings breathed their last on the grounds, that even the Dark Side seems warped and twisted by the area.
