

Feelings are part of the life of each of us. And it's up to us how we approach them and seem to let them lead us.

Elyon de Neverse learned to believe her feelings. Since she was a small girl who from the beginning tried to help others. The need to help Elyon took over from her parents who both helped others. She became a person who was kind, polite and friendly how parents teach her.

But she was the defender of weaker children, but also droids and animals who were hurt by older children. She feels stronger if she can help someone from trouble.

In these times, Elyon began to notice the special things that were gunning when she was angry. One boy who pulled one girl behind her hair, so he raised his air. Or, she wanted quietly that the kid in question was falling and it was worth it. After these events, Elyon tried to repeat it without anger.

The bigger challenge came when her master, the former one, came into her life. The master discovered Elyon by accident while she was on Naboo on a medical mission. It was a shock for Elyon. It was difficult to leave home and leave her parents, even though they supported her. The pain of losing the family's home was profound and Elyon thought it would never go away. But life as a Jedi taught her a different look at life.

Over the years, Elyon has freed herself from the role of rookie and devoted herself fully to her duties. The child became a young lady who loved life in the temple. Her duties were everything to her. She always accepted new tasks with enthusiasm. Elyon was proud of who she was, but at the same time she didn't lose the will to fight and also she didn't lose willing to help, quite the opposite. Once her master revealed the possibilities of Jedi healers, Elyon knew that this is the way.

Elyon's dark times came when the Clone Wars broke out. There have been changes in the lives of the Jedi. Laughter and joy faded from temple life. All that was left were duties, bad news and death. Death was ubiquitous. Although the Jedi must not succumb to fear, she saw it in the eyes of many of them at that

time. Sometimes she felt it too. The faces of those who died or were unable to save themselves with the master returned to her in dreams like nightmares.

In these times he received the most fundamental motivation. On one of the missions outside the Temple, she did not turn her back on the wounded enemy. He threatened to kill her, but she saved him anyway, and he thanked her for it. After this incident, Elyon became even more stubborn, but at the same time she became an optimist who was trying to see the world brighter than it was.

Optimism, responsibility, dedication to others and friendliness were Elyon's weapons against a bad time and bad dreams.

Unfortunately, neither her optimism nor her stubbornness in protecting what she valued and what she loved could prepare her for what came in the end. The day Order 66 was issued was the worst day of her life. And even after all these years, she still feels the pain she was experiencing. The pain of losing everything she loved and the life that was everything to her was like a blow to the heart. This wound will never heal again. It still hurts and reminds me of all the bad things that have happened and forces Elyon to doubt herself and her previous decisions.

The feeling of doubt still remains in her even now that she has become a member of the Clan Odan-Urr. Is she good enough to be part of a clan? Does she still have the right to be called a Jedi after she escaped and hid like a small child? Elyon thinks about the day she fought with herself so many years ago. With the help of the Force, she managed to escape the death at the hands of the clones. She felt scared, yes scared, when the clones were trying to kill her. Fear was replaced by sadness and pain.

Sadness and pain are the feelings that Elyon felt the most in her life in the dark ages. Pain and the lamentation of the sufferers were her daily bread, and she found it difficult to compare them. From time to time, even today, he feels distressed and helpless when he cannot help or see someone suffer. Sadness always overwhelms her when something goes wrong and it means pain or injustice to someone else. Sadness and grief also bring rain because it reminds her of crying. As a little girl, she loved water and rain, but today she no longer looks at rain.

After Elyon woke up by this time, it was hard for her not to give up. Elyon felt the pain of losing the parents she goes to each year to lay a bouquet on the grave. Elyon also carries the pain of losing members of the Old Jedi Order, but especially her master. When Elyon remembers her, she wonders what she would say to her. Would she be proud of her because she happened to not give up? Or she would consider her a coward who turned his back on everyone in the Order. Unfortunately, Elyon will never know.

Elyon has been asking herself one crucial question lately. Is she the person she was supposed to become? Does the past still have power over it?

However, her current master entered her life, leading her in the most difficult moments when she hesitated over herself. He became a role model for her, which Elyon admires and tries to approach. If someone asked her if she felt anything for her master, she would be lying. She respects him and takes him as her father's authority. In a way, she likes him because of what he's done for her.

Despite everything that happened to Elyon, she believes in her feelings. She certainly knows that being a Jedi and a healer is her mission. She will continue to fight and work on herself so that the shadows of the past such as pain, her distrust of herself and grief can no longer have any power over her. She will be even stronger in her principles of friendship, of intransigence in helping others, but also of the harsh self-reflection that she considers necessary for her life and the protection of the lives of those who need it.

In conclusion, Elyon is a strong woman who has gone through many as well as many other clan members. She decided to intensify with the pain of the past and thus become even stronger for others. Her duties and her life in the clan are now everything to her. She is devoted to the Force and the New Jedi Order. She feels proud that she did not give up and became a Knight, as both her masters wished. In the future, Elyon will still be torn between the past and the future. It will have worse days when pain and grief will prevail over it. Most of the time she will be who she is supposed to be: strong, devoted, faithful and friendly who will not spoil the fun and never, I repeat Never give up!
