<p style="text-align: center;">Physical Description</p> <p>Physical Description of character. Can include:</p> <p>Melvin has dark brown shoulder-length hair that is wavy and slightly unkempt. He has permanent bags under his brown, beady eyes and fuzzy, thick eyebrows.</p> <p>The Human has a non-athletic mesomorph body. Surprisingly his body lacks any kind of birthmark, tattoo or even stretchmarks.</p> <p>He wears a circle shaped beard, usually covered by a beard net for hygiene purposes.</p> <p>He has a breathy voice.</p>		<p style="text-align: center;">Loadout Weapons</p> <p>* 1x Scalpel</p>
<p>General Aspects</p>		
<p>I am the Very Model of a Scientist Selenian Melvin's life has been devoted to science. He takes great pride in the progress he makes and is a fantastic project leader. He loves to work with others that are interested in the medical disciplines, but he loathes people who do not take it seriously.</p>		<p>Resourceful Researcher Polaris' life is filled with training and learning for all sorts of situations, from the mind-numbingly normal to the utterly bizarre. As such, Melvin has developed into a rathis resourceful individual. This has made the Field Medic a mix of academic and scholar, always with something to offer to any discussion. However, knowledge and training does not always translate well to the tense environment of the battlefield, and no amount of textbooks can prepare one for reality...</p>
<p>Personality Aspects</p>		
<p>Gotta Keep up Appearances Polaris is known for walking tall despite being of below average stature. He is quick to anger when called out for his height, and is not afraid of taking on an opponent regardless of their size or intimidation factor. This same tenacity makes him easier to rile up, which can be a good or bad thing depending on the situation at hand.</p>		<p>Always Grumpy Unfortunately for most of his colleagues, Melvin seems to be angry very often. He doesn't hold back his frustrations and especially vents his frustrations on furniture. The only thing that seems to calm him down from time to time is a hot cup of tea and a good holobook.</p>

Combat Aspects

Scalpel Please

Melvin, like most of his peers, has trained with a blaster though, just like any weapon, hates to use it. Instead, when forced to fight, Solaris will use his surgical scalpels and anesthetics (poisons) to attempt to injure and incapacitate opponents. This requires his to get extremely close to his attackers and leaves him vulnerable to more maritally-inclined fighters and ranged specialists

Keep it Civil

Melv doesn't like to kill people; instead he chooses to injure his opponent until that person is unable to fight back or is otherwise incapacitated.
