Description: Measuring just under 100 meters, the IPV-2C Stealth Corvette was developed by Sienar Fleet Systems as an experimental for the Galactic Republic. Hyperdrive capable, this vessel has exceptional speed and great maneuverability with only light shields and moderate armor. While intended to sneak past enemy lines, the technology's enormous expense and maintenance requirements led to the ship never entering mass production.

Armament:

- 2 dual laser cannon turrets
- 4 missile launchers

Complement:

- 12 crew for full effectiveness
- 20 metric tons of cargo

Item Slots: None

Aspect/Upgrade Slots:

- 1 slot allowing Aspects of type Space Vehicle Cosmetic

Granted Item Aspects:

- Stealth Drive: This vessel has been outfitted with a cloaking device rendering it invisible to scanners and visual detection. It is circumvented through the use of tracking torpedoes and interdiction fields, which render the device inoperable.
