

# IMPERIAL II STAR DESTROYER "THE QUAD"

- Item Prototype Rarity: Rare
- Item Prototype Cost: \$320,000,000
- Item Prototype Description:

The Imperial II-class Star Destroyer "The Quad" is a standard 1600-meter long Destroyer. The Sovereign Principate however recovered blueprints from early Trade Federation designs of their quad turbolasers and cannons. Building off that design, the SF has implemented this version to showcase against the Tenixir Revenants Navy.

This new weapon consists of four linked laser cannons which fired alternately in pairs or individually in rapid succession. Visually the ISD II remains the same

platform. One major modification was needed throughout the main fuselage. The fuselage was equipped with reinforced cross sections to support the weight of the new turret batteries. Secondly, advanced targeting and control systems have been added to coincide with the ship's system programming. Lastly, a cooling/venting system has been installed to vent the gases expelled from inside the turret sections reducing overheating.

- Armament
- 50 heavy quad turbolaser batteries
- 50 quad turbolaser batteries
- 20 quad heavy ion cannons
- 10 tractor beams
- Complement
- 36,735 crew for full effectiveness
- 36,000 metric tons of cargo
- 9700 passengers/troops
- 6 squadrons of starfighters
