#### Description

The Quasar Courier-class Heavy Freighter is a 340-meter long triangle shaped Frigate that has been modified into a cargo hauling Heavy Freighter. Boasting better anti-starfighter defenses and a stronger hull, this vessel is used to move bulky supplies and equipment through the galaxy with a minimum of support. Hyperdrive capable, this vessel has poor maneuverability and speed, with medium armor and shielding. All four cargo bays have their own tractor beam for ease of loading, and additional hardpoints have been fitted for better defense against piracy.

#### Armament

6 dual turbolaser turrets

4 tractor beams

2 torpedo launchers

#### Complement

150 crew for full effectiveness

85 passengers/troops

80,000 metric tons of cargo
