

### "Bounty 3"

"Dragon here," the young woman asked the older bartender at a pub near Theed, the capital of Naboo.

"Yeah, here. And he's leaving an advisory trigger behind. He's in the mountains," the bartender replied as he refilled her.

"And the Queen didn't do anything about it," the woman asked, finding it strange.

"Yes, of course, but all attempts to destroy the creature failed," the man admitted with a sigh.

"You said that that dragon lives in the mountains," she assured herself.

"Yeah, why," he wondered.

"Just so, thanks for the information," the woman said, paying and leaving the pub. The woman was Elyon de Neverse, a Jedi, and native of Nabooian.

\*Dragon on Naboo,\* she shook her head and went out on the way to the mountains.

Elyon came out of the village and headed for the forest, which will get to the mountains the fastest. The road to the mountains was a pleasant walk if you know the local forests and swamps. Elyon avoided all the dangerous places and thought as she walked. She remembered the stories about dragons that her mother had told her when she was little. She thought it was a fairy tale at the time, and now she is going to look at one such creature.

It reached the foot of the mountains and there were already visible signs of damage to vegetation and the existence of a large creature. Elyon reached into the Force to sense a creature that already knew about her.

\*Interesting,\* she said to herself and went to the mountains.

With each step deeper and higher in the mountains, Elyon felt the creature's presence. It was strange, she felt the creature watching her, waiting to see what she would do. Before long, Elyon stood before a huge crack in the rock. Skeletons of farm animals were strewn around the entrance.

Elyon moved slowly and cautiously forward as she sensed the creature directly above her. She was able to jump back by a Force-strengthened salt back from the creature's attack.

The creature landed gracefully in front of her and straightened. The two then stared at each other for a moment before the creature attacked her with fire this time. Elyon didn't have much time, but she managed to erect a barrier in front of her on which the flames just slid. After a moment of attack, the dragon found that his opponent could defend herself and stopped attacking and looked at Elyon again.

He was a beautiful blue dragon. The reflections of the sun's rays reflected off his eyes and scales.

Nothing happened for a long time, so Elyon decided to make contact with the creature through the Force. She reached out to the creature in the Force and sent him emotions and scenes in which she communicated her friendly intentions and waited for his reaction. The dragon was still staring at her. Then, however, he turned and walked to his crack.

\*Should I follow him,\* she asked herself, but in the end she might be able to convince him in his environment of her intentions. And so she followed him and entered the crack behind him.

A few meters behind the crack, an arched cave erupted from the water. The dragon sensed Elyon following him, so he turned and shouted. Elyon stopped and watched him. She tried to make contact with him again, but again without a response.

\*I can't go to him because he could take it as an attack on his territory.\* Elyon thought about how to proceed.

\*Maybe when I sit down and show it in a higher position. He won't be so careful and he can tolerate me,\* she decided and sat down. She was ready to get up quickly if her theory didn't work.

The dragon was still watching her, but he didn't attack her. Elyon took that as a good sign. And again she sent him her friendly message through the Force. This time she felt a slight tremor. Elyon knew the dragon was reacting to her. And she kept trying to contact her.

It took hours for her to convince him of her intentions. It gave her enough work to understand him to be different but lonely. Elyon took advantage of this feeling and offered an alliance that would win the two. After thinking for a while, the dragon agreed.

And so Elyon began to make friends with the dragon, whom she would transfer to Kiast to keep the alliance, and the dragon would not be alone. . .
