Item Aspect/Upgrade Slots: 3

Cost: 32,000

The Ascendant Puffer Pig is a species of pig, capable of sniffing out minerals more efficiently than mining scanners. As such, they are very valuable to smugglers and miners alike. Normally a docile species, they are capable of inflating themselves when threatened. Their crystal mutations have given this ballooning feature a dangerous hedgehog capacity, while its mineral-sniffing skills are most valuable when finding other Ascendant crystals and crystal-infused creatures or materiel.
