

NAME: Nevis, Benn
SPECIES: Human
AGE: 42 human years
SEX: Male
HEIGHT: 1.89 M
WEIGHT: 124.7 kg
DISTINGUISHING FEATURES: None

Subject is considered an nobody within his own family group (believe they are called “clans”?) and within the Brotherhood at large.

Subject is considered a NONCOMBATANT by our standards.

Subject is a healer of extreme skill, and will fight if pressed. However, the subject would rather be left alone to prepare food and read books and teach.

It should be noted that the subject does have one of the laser swords many of the Brotherhood carry. His observed attack is to bludgeon his opponent into submission. Subject is adept at use of said weapon and can deflect our blaster beams back at us with ease. I WOULD SUGGEST USE OF A SLUG THROWER WHEN/IF ATTACKING.

Subject prefers spending his time alone and cooking fancy meals. *NOTE: Consider capturing him to have him cook for us?. Maybe sift his brain for cooking tips?*

Subject has a gift for healing and has been known to assist in acting as a doctor for his family group.

Subject is in tune with the Force. He is known to enjoy meditation and becomes one with the Force. He claims he can *feel* or *sense* things all around him.

Note: maybe we can dissect his brain to find out more information on this and use it to our advantage?

All in all this subject is pretty much a naught. Getting rid of him might actually benefit the Brotherhood.
