

## **Port Kasiya Arroyo District: Asteroid Impact Zone.**

Lightning bursts from the sky as Crystal structures erupt from the ground in Port Kasiya's Arroyo District. What previously served as the district's source of electrical power for the city has been converted into a crystal sanctuary.

The Crystals burst in every direction, glowing with an ominous red hum. The presence of The dark side can be felt through them, even to those not sensitive to the Force. The crystals are sharp and jagged, creating a hazardous terrain to those who fight amongst them. A single bridge from the district to the asteroid lights the way for those who dare step inside the makeshift crystal palace.

The Taldryan Consul, Appius Taldrya Wight, was imprisoned within the asteroid, and has told the tale of how near impossible it is to escape once inside. Those who tread this path must be wary a similar fate does not befall them.
