Description

The Ascendant Vornskr is a modification of the Vornskr species -- a predatory canine with a whiplike venomous tail. The Ascendant variety features large crystalline structure protruding from its head, torso, claws and legs. Its tail also ends in such a structure and its eyes glow a corrupted Sith red.

Features
Venomous

Item Slots
None

Aspect/Upgrade Slots

- 1 slot allowing Aspects of type *Creature Personality*
- 1 slot allowing Aspects of type *Creature Physical*

Granted Item Aspects

- **Untameable:** [this item] is wild, and its behavior cannot be modified to accept the presence of humanoids. It cannot be trained to abandon its wild instincts and will generally continue to do whatever it wants. As creature handling goes up, a character can better predict what this creature will do and empathize and understand it despite being unable to tame it. With proficiency (+3) a member could manage to successfully own and cage this creature but not safely interact with it and influence its behavior, with a better understanding and ability to manage this [this item] coming with mastery (+5).
- **Venomous Tail: Ascendant Vornskr:** ****Severe:**** [prototype item]'s claws and tail carry a poison imbued with the Dark Side of the Force, and can inflict fear similar to the ****Terror**** Force Power on contact.
