Statement

Revak Vadon K'Urr is the current leader of the organization known as Clan Odan-Urr who is affiliated with the Dark Jedi Brotherhood. I have yet to ascertain very much of the target's past but from what I've gathered, the target was trained in both the light and dark sides of the Force. Compared to others of similar species, the target is of above average intelligence with average physical strength and speed. As a Zabrak the target has higher endurance and higher tolerances to pain compared to the average Human. The target is proficient in the Niman lightsaber fighting style where the target deploys two lightsabers at the same time (either one in each hand or joined together). The target also carries a E-851 blaster pistol that is kept in a holster strapped to the target's right thigh and a Sith dagger (obtained during Inquisitor training?) which remains sheathed vertically across the lower back. Sources tell me that the target remains stoic on the battlefield. The target is a meticulous planner who is always prepared, but because of this, has trouble backing down during a fight. Confidence? Arrogance? I will have to continue my observations to know for sure. The target is well trained in the Force, deploying telekinesis and mindtricks while concealed. When out in open ground, the target uses ranged attacks such as Force lightning, blinding powers, grenades and barriers for a defense. The target typically wears the armor of the Jedi Generals with a cloak emblazoned with the Clan Odan-Urr (COU) crest. The target has two main modes of transportation. Other than Clan ships, the target travels on a Dalgo and owns a personal VT-49 Decimator. As the mission progresses, I can collect more information on the target. It is my recommendation though, that the target either be terminated or captured for assimilation.

I hereby declare the above information and statements above are accurate to the best of my knowledge
