Description: The SM-21F "Shard" Flechette Carbine is a rapid firing projectile carbine. Used to great effect by the Children of Mortis, this weapon is light and agile. Ammunition fired by the SM-21F consists of small darts, tipped with kyber crystals, wrapped in a sabot. The flechette round pierces light to medium armor and flesh, and begins to tumble on entry, creating large wounds inside the target. Although this weapon is extraordinarily accurate, it has a limited range and limited magazine capacity.
