TARGET DOSSIER: LOCKE SONJIE

(Image from wiki, originally created by Waldron Ravenblade)

Clan: Naga Sadow

Background:

A long time member of the Dark Brotherhood whose earlier origins are a mystery, Locke Sonjie is a dark side zealot that our intelligence indicates will never betray the Brotherhood. He has served in their ranks for over ten years in a variety of positions. He is known to attempt diplomacy prior to engaging in combat, but also has a short temper and our experience indicates that he won't hesitate to engage in combat. Target demonstrates

near limitless endurance and heavy use of Force abilities. Target is also competent in lightsaber combat.

Combat Recommendations:

Our observations indicate the target observes opponents in combat and tries to wear them down slowly over time. Target has been observed doing this with multiple opponents during sparring matches. Target is also not as agile as some of his peers. Therefore your best chance of success is a quick and unrelenting ambush. We also recommend unorthodox tactics as our spies indicate the target spends considerable time studying existing techniques. If you are not successful within the first standard minute of an engagement, retreat or call for support.

Additional Information:

Target is also competent in the use of blasters and explosives. Target typically carries a blaster carbine and pistol as well as multiple grenade-type weapons.

Target is also highly unlikely to be found alone. May be baited into solo engagements by the promise of excitement or if allies are separated otherwise.

Force User Information:

Target is proficient in the lightsaber forms Makashi and Niman, with cursory knowledge of other forms. He also frequently uses telekinesis and force lightning in battle and as such can be unpredictable.

As noted previously, the best way to engage this target is in a quick ambush or not at all.
