

**Name:** Crystalline Rotary Cannon

**Image:**

**Rarity:** Legendary

**Cost:** 115,000

**Category:** Special Blaster

**Type:** Weapon (Blaster)

**Description:**

The **Crystalline Rotary Cannon** is a six-barreled, electrically-driven rotary blaster. This blaster configuration allows the use of multiple barrels to overwhelm forces such as those deployed by the Children of Mortis in their campaign against the Dark Brotherhood in 40 ABY.

The technology inherent in such a design is further augmented in the use of the crystals recovered from the Children of Mortis and studied by the brightest minds of the Brotherhood. These crystals act as a focusing point that when combined with more standard blaster technology, creates a bolt that is able to melt through crystalline structures and armor in a manner superior to that of traditional weaponry.
