

Item Prototype Name: Crystal Shield

Example Item Image: Item From Dark Souls used as reference

Item Prototype Proposed Rarity: Epic

Item Prototype Proposed Cost: 100,000

Item Prototype Description (It is highly recommended you look at existing item prototypes for correct format) The Crystal Shield has been developed by Synergy Technologies Inc to act as a defensive weapon for the Soldiers of the Iron Legion as well as members of the Brotherhood. Able to withstand blasters and lightsabers similar to the arms and armour of the Children of Mortis, this shield whilst primarily a defensive item can be used with great effect to cause harm in close combat engagements whilst keeping its wielder safe.
