The Ascendant Crystal Cudgel is a large branch of hardwood, crudely formed with a wrapped handle and metal-ring pommel at the base, while the head sports a hodge podge array of ascendant crystals protruding from its body. The crystals are exceptionally hard, and thus make for excellent points for penetrating armor and flesh alike. Their ascendant aspect gives strikes an unnatural boost of kinetic power through their Force attunement.

Aspect Slots: Blunt Weapon Enhancement (I, II, III), Melee Weapon Cosmetic
