

Item Prototype Name: T.H.O.R. (Trimantium Helix Orbital Rail) System

Example Item Image:

Item Prototype Proposed Rarity: Legendary

Item Prototype Proposed Cost: 186,000

Item Prototype Description: A Republic-era orbital magnetic rail cannon system that fires a sextet of 72 meter long trimantium helix projectiles that shatter upon impact from orbit. Ideal for destroying large quantities of armored enemies or buildings, the helix design projectiles are capable of penetrating enemy deflector shielding. Targeting can be performed either by the ship's targeting computer or a target painter rifle on the ground.
