

Item Prototype Name - Electro Pulse Gauntlet (EPG)

Item Prototype Proposed Rarity - Epic Rarity due to materials it was constructed from

Item Prototype Proposed Cost - 55,000 credits

Item Prototype Description - Designed to emit an electromagnetic pulse of such magnitude to disable even hardened Separatist Battle droids. This experimental device was powered by Kyber Crystals and as such it used specialized materials in its construction such as Beskar to make it more durable. It was designed to be installed in the gauntlet of Phase II Clone Armor and was going to be used by specialized ARC Troopers and/or Clone Commando Units. The damaging pulse range was designed to be 300 meters with an instant droid kill range of 150 meters.
